Mountain Weather Forecast

Brecon Beacons National Park

Forecast valid from 06:00 on Thursday 09 Feb 2023 until 23:59 on Friday 10 Feb 2023

Forecast Issued on Thursday 09 Feb 2023 at 00:16

Confidence: High confidence that the weather will be quite settled over the coming days with high pressure over Southern United Kingdom but uncertainties lie in cloud amounts and where there will be cloud breaks, also low confidence in the amount of mist and fog that will develop each night.

Headline for Thursday 09 Feb 2023: Dry and bright morning, increasingly cloudy later.

Mountain weather hazards on Thursday 09 Feb 2023

Blizzards No Likelihood	**Heavy persistent snow** No Likelihood	**Storm force winds** No Likelihood

Forecast for Thursday 09 Feb 2023

Weather: Cloudy, perhaps with some rain at first, rain moving south leaving a lot of dry weather through the morning, perhaps some mist forming around dawn. A bright and sunny morning for most but cloud increasing a little from the west through the afternoon although remaining mostly at high level. Perhaps some mist and fog patches developing through the evening.

Chance of cloud-free hill tops above 600m: 90% cloud above all summits, perhaps a few patches around summits in the early morning.

Low cloud and visibility: A bright morning with excellent visibility and very little cloud below summit level, some patches at 600m. Visibility will be very good with far reaching views likely around the Brecon Beacons.

Valley	4/2	2/0	6/4	6/4	2/0	1/-1	2/-0
Freezing Level*	700m	500m	500m	600m	500m	500m	400m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Fresh westerly winds easing during the day and becoming mostly light. Note freezing level remaining below the summits.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
03:00 on Thu 09 Feb 2023	0.2mm	0.4mm	0.4mm

Forecast for Friday 10 Feb 2023

Weather: Cloudy but mostly dry, perhaps some drizzle forming where the cloud thickens enough in the west. A few cloud breaks may be possible in the east towards Crickhowell

Maximum wind: Southwesterly 10-15mph gusts 25mph.

Chance of cloud-free hill tops 600m: 80% falling to 40% later, low cloud in association with light rain or drizzle later in the day.

Low cloud and visibility: Patches of low cloud above 500m are expected throughout the day, cloud tending to thicken and lower towards the evening becoming broken above 400m. Visibility will be mainly good but becoming hazy later in the day and poor later in any drizzle.

Temperature: **Valleys:** Plus 1 rising to 6 Celsius.
At 600m: Minus 1 Celsius rising to 4 Celsius.
Freezing level: 500m rising above all summits.
